

The college has a well equipped state-of-the-art fully computerized and **air-conditioned** library that caters to the academic and intellectual needs of both students and faculty. It offers free internet access, an open-shelf system, and photocopying facilities to ensure that students are provided with essential tools for academic success. The library holds a collection of **34,565 books**, covering both the prescribed curriculum and areas of general interest. It subscribes to a wide range of national periodicals, journals, magazines, newspapers, e-journals, and databases. To ensure safety and efficient operation, the library is monitored by **eight CCTV cameras**. The Library includes separate sections for undergraduate and postgraduate students. Additionally, a dedicated reading area allows students to bring and use their personal books. In addition to the Central Library, the college also maintains departmental libraries that support subject-specific and practical learning needs. Furthermore, in alignment with the college's commitment to inclusive education, the library supports students from economically weaker sections through the **"Earn While You Learn"** scheme. This initiative not only provides financial assistance but also engages students in meaningful academic support roles within the library.
